Physician Attestation for Zika Testing

Zika virus assays are intended for use with specimens collected from individuals meeting CDC Zika virus clinical criteria (e.g., clinical signs and symptoms associated with Zika virus infection) and/or CDC Zika virus epidemiological criteria (e.g., history of residence in or travel to a geographic region with active Zika transmission at the time of travel, or other epidemiologic criteria for which Zika virus testing may be indicated as part of a public health investigation).

NCSLPH provides testing to patients when the following criteria are met:

- A pregnant woman who:
  - Spent time in an area with risk for Zika virus transmission while pregnant, or
  - Had unprotected sex with a partner who spent time in an area with risk for Zika virus transmission
- An individual with symptoms associated with Zika virus infection (rash, joint pain, fever, and/or conjunctivitis) who:
  - Spent time in an area with risk for Zika virus transmission, or
  - Had unprotected sex with a partner who spent time in an area with risk for Zika virus transmission

❑ I certify that the patient I am requesting Zika testing for meets the criteria outlined above.*

Physician Name (Print) _____

Physician Signature _____

*** For further guidance regarding eligibility for Zika testing, please visit the Zika Virus Testing page on the NCSLPH website at http://slph.ncpublichealth.com/zika/default.asp**
